DETAILED ACTION

Allowable Subject Matter

1. Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a scale detection unit for calculating and outputting a scale factor which is a division factor used for controlling a bit value of a butterfly operated signal input from the butterfly operation unit to the input buffer unit at each stage within a predetermined bit limit of the received OFDM signal; a scale count unit for cumulative counting a count coefficient corresponding to the scale factor input from the scale detection unit, and then outputting a first result; and a compensation unit for controlling the bit of a signal input from the butterfly operation unit according to values obtained from the scale detection unit and the scale count unit, and then outputting a second result, as specified in independent claims 1 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
